REGISTRATION

Registration

A maximum of 10 people may attend each session. The fee is \$1,000 per spot for the entire series. Any associate within the same practice may use the spot on a given date. You may consider this a per-clinic fee, regardless of who attends on a given date. Registrations must be received no later than April 1.

Cancellations should be made to the LSU School of Veterinary Medicine in a timely manner as space is limited.

Continuing Education Credit

Twenty (20) hours of continuing education credit or 2.0 CEU credits (one hour equals 0.1 CE unit) will be earned for this course.

Certification forms will be provided for participants to complete credit hours earned.

SMALL ANIMAL RADIOLOGY SEMINARS

April 7-June 16, 2010

PROGRAM

The LSU Radiology Service is excited to announce a small animal film interpretation seminar for veterinarians in private practice. The advanced course is designed to share and discuss challenging clinical cases touching upon a large variety of common diseases and give one-to-one interactions with a radiologist.

Topics will include: differentiating between surgical and non surgical abdominal disease, complex thoracic diseases, common contrast studies performed in the thorax and abdomen of small animals as well as identifying aggressive vs. non-aggressive bone disease and finally discuss some challenging developmental and orthopedic cases.

There will be 10, two-hour (6–8 p.m.) weekly sessions reviewing the topics. A maximum of 10 participants total for the seminar will be accepted. Each participant will be assigned a viewing workstation with digital images at each session. Each case will be reviewed individually with the aid of a board-certified veterinary radiologist and a follow-up group discussion.

Kick off session April 7, 2010.

The small animal radiology sessions will cover the following topics:

Thorax (4 sessions):

Thoracic wall disease, lung disease, mediastinal and pleural disease as well as cardiac cases, including common contrast studies perform in the thorax.

Abdomen (3 sessions):

Peritoneal and retroperitoneal radiographic assessment, major abdominal mass patterns of displacement, difference between paralytic and

mechanical ileus, common causes of acute abdomen in small animal patients. Additional common contrast studies performed in the abdomen.

Musculoskeletal (3 sessions):

Challenging developmental bone disease, difference between aggressive and non-aggressive bone lesions.

April 7 Thorax Session 1: Thoracic wall abnormalities, diaphragm, pleural

April 14 Thorax Session 2: Mediastinum, Esophagus, Trachea, and Contrast Studies

April 21 Thorax Session 3: Lung Disease

April 28 Thorax Session 4: Cardiac Disease

May 5 Abdomen Session 1: General Abdomen

May 12 Abdomen Session 2: Acute Abdomen, Functional/Mechanical Ileus Contrast Studies

May 19 Abdomen Session 3: Upper and Lower Urinary Tract

May 26 Musculoskeletal Session 1: Developmental/Traumatic Bone Disease

June 2 Musculoskeletal Session 2: Aggressive/Non-Aggressive Bone Disease

June 16 Musculoskeletal Session 3: Skull and Spinal Diseases

Fees

The fee is \$1,000 per spot for the entire series. Any associate within the same practice may use the spot on a given date. You may consider this a per-clinic fee, regardless of who attends on a given date.
