- Feline Ovariohysterectomy
- Canine Orchiectomy
- Canine Ovariohysterectomy
- Umbilical hernia repair (will be discussed, practiced upon availability.)

Interested in Learning More?

The Kansas Humane Society DVM Externship Program is designed to increase awareness of shelter medicine and population management through open communication and student observation. It is our goal to increase the surgical skills of the Externship Participants through one on one mentorship and repetitive practice; a truly quality learning experience.
